

iTEC Successfully Commissions PMU 132/11kV Kg Repah Substation

inCONTROL Tech made its success at Kg Repah Substation after achieving a successful Site Acceptance Test (SAT). This substation which is supervised under TNB's Seremban Asset Management (AM) Control serves as the Remote Terminal Unit (RTU) Station for PMU Kg Repah.

This Substation would power electricity to the outskirts area of Tampin Town and as well as Kg. Repah.

iTEC's success in this site commission further enhances and reinforces inCONTROL TECH's continuous improvement motto and its validation of the tough measures undertaken by inCONTROL TECH to make a significant mark on the engineering practices in Malaysia and the region.
