

## **iTEC successfully delivered its first Wind Farm 132/22kV Relay Panels to Australia**

After successfully completing and going through Factory Acceptance Test, iTEC made its first achievements in the Wind Farm Industry. Among task which was carried out was designing of the panels, manufacturing, supply and factory test of relay panel and lastly SCADA Panel.

Mr. Francious Pambrun, Senior System Manager from Areva Australia, who made a special visit to Malaysia to see the progress of the panels was pleased with the design and manufacturing capabilities in iTEC. He also congratulated the team whom demonstrated efficiency and professionalism in execution of this project.

The panel was delivered on the 14<sup>th</sup> September to Australia.
